

fat reduction laser

no diet is that fast

your reliable way to a perfect body

Lapex BCS - 2000 Pro

- + treatment of waist, "saddle bags", etc.
- + focused attacking stubborn fat deposits
- + an improved complexion
- + the reduction of cellulite

Woman with body height 166cm after 4 weeks and 8 Lipolaser treatments, each followed by a personal fitness training unit (60min)

before

- + weight 61.8 kg
- + body fat 29.2%
- + muscle mass 41.5%

after 4 weeks

- + weight 61.8 kg
- + body fat 26.3%
- + muscle mass 43.3%

To provide sustained lasting success, we offer a fat reduction laser treatment only in combination with a subsequent fitness training, as only then the released fat reserves can be burned.

Gentle – natural – pain free

The operation of the Lapex BCS is of well-proven success - problem zones are being effectively reduced using natural processes. Simultaneously, the lymph system is being activated. The collagen of the skin is being supported and increases their elasticity - cellulite disappears or is significantly reduced.

The treatment is painless, without risk of an operation and early goal directed (treatment of waist recommends 8 sessions of 40-50 minutes within 4 weeks).

Down with fat deposits and cellulite

Reducing body fat. Bodyforming. Treatment of cellulite. Everything with one treatment method. The innovative laser technology of the Lapex BCS revolutionized fat treatment to a better holistic body feeling. Problem areas are being attacked effectively and efficiently.

Lapex BCS stimulates the fat cells of your body to release its contents to the surrounding tissue. This energy - the fat - from the cells can now be removed much easier.
